

TOWN OF KYLE

2023 AREAS OF FOCUS

The Town of Kyle Council would like to keep you up-to-date with our plans for the 2023 tax year. You can find the 2023 budget on our website. Here is a brief explanation of projects that council kept in mind while planning their budget year.

1. Street Repair- This is a big one! We are aware of the condition of our roads and the want/need to do something about this! This year the Town purchased a 40" high flow planer that attaches to our Bobcat. This will be used to grind up the roads into loose material that can then be packed and bind together to smooth out the roads. This is a new process so please be patient with our employees as this project is worked through. We are confident this will be the answer! This year our goal is to work on 1st and 2nd Street.
2. Sewer Lining- This is a continued Capital Plan that was started 2 years ago. Each year we contract New Line Trenchless Technologies to line our existing sewer lines that are in the worst shape. This saves us from having to dig up our roads and replace sewers after break situations in the future. This revives our lines and gives them another 75 years of life. This year we are lining down Main Street from Railway to 2nd Avenue.
3. Sidewalks- Our goal is to continue replacing broken and dangerous sidewalks each year. We will do about 100Ft. These locations will be decided this spring.
4. Fire Hydrant- There was a large water break around the Fire Hydrant on Alfred Street. This repair has been done and we would like to thank those residents whose homes were interrupted multiple times with water shut offs and boil advisories.
5. Dog Park/Gazebo- These are 2 projects we are still working through, they were popular and had a lot of positive feedback with our small questionnaire that went out in the newsletter early this year. Thank You to everyone for your participation, we took all comments and concerns into consideration!
